

Name: _____

VIP ID: _____

- Write your name and VIP ID in the space provided above.
- The test has five (5) pages, including this one.
- The test is fifty (50) minutes long.
- Enter your answer in the boxes provided.
- You must show sufficient work to justify all answers unless otherwise stated in the problem. Correct answers with inconsistent work may not be given credit.
- Credit for each problem is given in parentheses at the right of the problem number.
- No books, notes or calculators may be used on this test.

Page	Max. points	Your points
2	40	
3	20	
4	20	
5	20	
Total	100	

Problem 1 (20 pts—10 pts each). Evaluate the following integrals:

(a) $\int_{\pi/3}^{2\pi/3} \int_0^{\cot x} 3 \tan x \, dy \, dx =$

(b) $\int_0^{\pi/3} \int_0^{\pi/3} \int_0^{\pi/3} \cos(x + y + z) \, dx \, dy \, dz =$

Problem 2 (20 pts). Evaluate $\int_R (3x + 4y^2) \, dA$, where R is the region in the upper half-plane bounded by the circles $x^2 + y^2 = 1$ and $x^2 + y^2 = 4$. Sketch the region of integration.

$$\int_R (3x + 4y^2) \, dA =$$

Problem 3 (20 pts). Evaluate the integral $\int_D \sin(y^2) dA$ where D is the triangle with vertices $(0, 0)$, $(1, 1)$ and $(0, 1)$. Sketch the domain of integration.

Hint: The order of integration really matters for this problem.

$$\int_D \sin(y^2) dA =$$

Problem 4 (20 pts—10 points each). Sketch the domain of integration, and convert the following integrals to polar coordinates. **Do not evaluate.**

(a) $\int_{-5}^5 \int_0^{\sqrt{25-x^2}} 4x^2 y^3 \, dy \, dx =$

(b) $\int_0^1 \int_0^y x \, dx \, dy =$

Problem 5 (20 pts). Use a double or a triple integral (your choice!) to compute the volume under the graph of $f(x, y) = xy$ and above the region bounded by $x = y^2$ and $x = y$.

$$V = \iint_D f(x, y) \, dA = \iiint_R dV =$$
