

Name: _____

4-digit code: _____

- Write your name and the last 4 digits of your SSN in the space provided above.
- The test has three (3) pages, including this one.
- The test is fifty (50) minutes long.
- Enter your answer in the boxes provided.
- You must show sufficient work to justify all answers unless otherwise stated in the problem. Correct answers with inconsistent work may not be given credit.
- Credit for each problem is given in parentheses at the right of the problem number.
- No books, notes or calculators may be used on this test.

Page	Max. points	Your points
2	50	
3	50	
Total	100	

Problem 1 (25 pts). Calculate the double integral $\int_R \frac{1+x^2}{1+y^2} dA$, for the rectangle $R = [0, 1] \times [0, 1]$.

Problem 2 (25 pts). Use a double or a triple integral (your choice!) to compute the volume under the surface $z = xy$ and above the region bounded by $x = y^2$ and $x = y^3$.

Problem 3 (25 pts). Evaluate $\int_R (3x + 4y^2) dA$, where R is the region in the upper half-plane bounded by the circles $x^2 + y^2 = 1$ and $x^2 + y^2 = 4$.

Problem 4 (25 pts). Evaluate the integral $\int_D \sin(y^2) dA$ where D is the triangle with vertices $(0, 0)$, $(1, 1)$ and $(0, 1)$.
