Comments Report

7.3) Please comment on what you feel are the positive and negative aspects of your instructor and his/her teaching outlook:

I need to take 4 different foreign languages
to understand my last 4 math teachers.

Good teacher + tried hard to motivate us to learn

Had a little trouble understanding his english at times.

Explained the material well & tested fairly. Sometimes had trouble answering our questions

Our instructor needs to speak better english, that is the main problem.

He was very willing to meet w/ students out of the classroom & help w/ homework & other questions.

Has trouble with english and makes mistakes on examples but tries hard & has an understanding

He gave quizzes at least once a week, that was good because it made me study a little more which prepared me for the test, He also gave homework on a regular bases, that was good also.

Prof Flattot is a good professor. Seems to know the material. I personally understood his teaching method.

Good teacher, sometimes hard to understand, but as we went I could understand better. Really wanted to help us learn.

The lack of clear examples was bothersome. Also the refusal to allow a note sheet on exam 1 was short sighted in my opinion.

7.4) Comment on what you feel are the positive and negative aspects of this course:

Tough course, but if understand, will do well

Not very useful in other engineering courses. Material is easy to pick up with the background you have through pre-reqs.

positive: none

negs: all

Not Bad

One great benefit to the course would be some sort of supplemental instruction. I found myself in the Math help lab, but sometimes they could not answer my questions.
