VIP ID:	

- Write your name and VIP ID in the space provided above.
- The test has three (3) pages, including this one.
- Credit for each problem is given in parentheses at the right of the problem number.
- No books, notes or scratch paper may be used on this test.
- An approved calculator may be used on this test.

Problem 1 (10 + 15 pts). Evaluate the following integrals.

(a)
$$\int_{1.1}^{1.8} e^t \ln t \, dt =$$

(b)
$$\int_{1}^{108} 10xe^{x^2} dx =$$

Problem 2 (25 pts). Find the average value of the function $f(x) = 11 + 10x - x^2$ between x = 0 and x = 3.

Problem 3 (25 pts). For a product, the demand curve is $p = 80e^{-0.008q}$ and the supply curve is $p = 4\sqrt{q} + 10$ for $0 \le q \le 500$, where q is quantity and p is price in dollars per unit. Find the consumer surplus at the equilibrium (round your answer to the nearest dollar).

Problem 4 (25 pts). A forest fire covers 2002 acres at time t = 0. The fire is growing at a rate of $8\sqrt{t}$ acres per hour, where t is in hours. How many acres are covered 24 hours later? (round your answer to the nearest integer)
